In this project, we propose to investigate the development of a battery-free UAV that can survive in the air and sustain long-term ...

With the integration of solar photovoltaic (PV) technology for powering the aircraft, military surveillance, traffic control, environmental and meteorological monitoring, civil border ...

Here, we focus on discussing the existing UAV energy harvesting methods from the perspective of solar and mechanical energy. Based on these energy sources, we also discuss ...

This letter introduces a photovoltaic (PV)-battery wireless charger tailored for unmanned aerial vehicles (UAVs), enabling seamless automatic charging. Sharing the resonant tank enhances ...
