Operators of 5G base stations have invested in constructing numerous communication facilities and configured extensive energy ...

In recent years, researchers have delved into the energy consumption models and energy management strategies of 5G base stations to achieve their dual role in ...

The literature [9] proposed a virtual power plant optimization scheduling model and found that incorporating the base station energy storage into the virtual power plant can effectively ...

Cellular communication is an important enabler to support new power grid architectures and operational models. Power grid protection and remote control can be implemented using ...
