Which US energy storage projects has Saft delivered?

Since delivering its first US energy storage project in Alaska in 2003, Saft has also delivered major projects such as the Myrtle and Danish Fields utility scale solar power plants in Texas, US, each exceeding 200 megawatt-hours (MWh) of storage.

Why is energy storage important?

Energy storage makes a vital contribution to the decarbonization of the energy mix as an integral element of renewable energy installations, microgrids and grid stability projects. According to Bloomberg the US is the second largest and most mature ESS market in the world, with 2023 being a record year that saw 22 GWh of capacity deployed.

What is Antora energy storage?

Thermal energy storage. Made in America. Antora turns cheap, clean energy into the standard that powers global industry. Charges with surplus clean electricity to deliver cost-effective energy at a predictable price. Multi-day storage delivers always-on heat and power for industrial operations where downtime is not an option.
