What is arc quenching switchgear?

Arc Quenching Switchgear minimizes or eliminates damage to switchgear in the event of an arc fault, protecting valuable switchgear assets from arc flash damage. It is designed to reduce peak fault current by at least 25% and peak stress on upstream equipment by at least 44% when compared to a bolted fault device.

Why should you use arc flash protection?

Arc Flash Detection - Explosion risk, injury to personnel and costly downtime can be avoided with an Arc-Flash Protection solution for surveillance of switchboards, transformers, and capacitor load banks, etc. Circuit breakers or overcurrent protection devices alone do not provide optimal protection for your personnel and equipment.
