-----

The short answer is: solar panels can protect your roof and extend its lifespan, but only if your roof is in good condition before the installation and the panels are correctly installed.

Modern solar panels are carefully engineered to last 25-30 years or more with minimal loss in performance, making them one of the most reliable long-term investments for your home.

High-quality, durable solar panels are engineered to resist degradation and maintain their performance, even in harsh conditions. By choosing solar panels that have ...

When temperatures rise, solar panels face a dual challenge that impacts both their immediate power output and their long-term durability. Put simply, high heat causes solar ...
