Kaster has retrofitted his Bronx, New York, home to Passive House standards, a project that included the installation of 6 in. of rigid foam insulation on top of his roof deck.

The primary role of solar panels is energy production, not insulating your home or roof structure. As such, although they form a physical barrier over your roof, their capacity to ...

Solar panel installations put a mechanical load on the underlying roof construction. ROCKWOOL roof insulation is designed to withstand this ...

Do Solar Panels Make Your Roof Last LongerSolar Panel InsulationDo Solar Panels Absorb Heat Or LightHow Do Solar Panels WorkHeat Under Solar PanelsDo Solar Panels Reduce Global WarmingTesla Solar PanelsEffects of Solar Photovoltaic Panels on Roof Heat TransferFAQsSummarySolar panels are a great way to insulate your home. They provide a barrier between the outside and the inside of your home, keeping the heat in during the winter and out during the summer. This can help you save money on your energy bills, as well as keep your home more comfortable year-round.
