How many solar PV installations are there in Denmark?

The latest version can be found below and shows a total expansion of solar PV in Denmark of more than 3.3 GW as of 1 July 2023.. The installations consist of both large installations in the open country as well as smaller installations, mainly on rooftop. Solar PV Statistics 2nd quarter 2023 (Only available in Danish)

How much solar power does Denmark have?

Solar power in Denmark amounts to 4,832 MW of grid-connected PV capacity at the end of September 2025, and contributes to a government target to use 100% renewable electricity by 2030 and 100% renewable energy by 2050. Solar power produced 11.2% of Danish electricity generation in 2024, the highest share in the Nordic countries.

Why is solar energy important in Denmark?

Solar energy, therefore, plays a key role in realizing Denmark's ambition of covering our net electricity consumption with 100% renewable energy by 2030. Every quarter, the Danish Energy Agency publishes a solar PV inventory describing the status of the expansion of solar PV in Denmark.

Can solar energy be harnessed in Denmark?

There is great potential for harnessing solar energy in Denmark. At the same time, the costs associated with producing electricity from solar PV (photovoltaics) have dropped significantly in recent years, and solar PV are now one of the most cost-effective and competitive ways of producing electricity.

Operated by BeGreen, a wholly owned subsidiary of Equinor, the plant features over 100,000 solar panels and six transformer stations. The facility is expected to generate ...

Herreds Plantage Vindmøller. Lyne-Sdr. Vium Vindmøllepark. Sdr. Esterbølle Vindmøller. Den Selvejende Institution Bindslev Gl. Elværk.

The positive lists are lists of energy storage units, generators and inverters that Green Power Denmark has assessed to be in compliance with the technical requirements for connection to ...

As traditional power stations become increasingly marginal, new installations--particularly offshore wind farms and solar arrays--must be equipped to handle ...
