How much does a car battery swap station cost?

The average cost to build a passenger car battery swap station is around \$500,000, according to CNBC. That's significantly higher than the cost of installing a two-port charging station, which typically range from \$200,000 to \$300,000.

How many EV battery swaps a day?

China-based EV car manufacturer NIO claims that it delivers a fully charged battery pack almost every second, completing about 79,000 battery swaps per day -- 50 million cumulative swap in total -- across its network of stations.

Is battery swapping a viable option?

After years of relative obscurity, battery swapping is starting to be considered a viable option for the sector going forward. Quite simply this is because of the speed battery swapping offers.

How many battery swap stations does Gogoro have?

With more than 12,000 battery swap stations across Asia, Gogoro's network processes nearly 400,000 battery swaps daily. The company expanded into India in partnership with Hero MotoCorp with hopes of making inroads in the world's largest two-wheeler market.
