Solar energy is widely available in Armenia due to its geographical position and is considered a developing industry. In 2022 less than 2% of Armenia's electricity was generated by solar power.

As of today, solar power plants with a total installed capacity of around 1,045 MW are connected to Armenia's national energy system -- a historic milestone for the country.

Solar energy production in the country grew from 0.4 million kilowatt-hours in 2017 to 56.5 million kilowatt-hours in 2020, according to official statistics. A megawatt is a derived unit of power ...

Armenia's solar energy capacity has surged, reaching its ambitious goal of 1,000 MW (or 1 gigawatt) of installed capacity. This significant milestone, confirmed by the Ministry of ...
