---

You know, Armenia's rolling hills and abundant sunshine make it prime territory for solar energy. But here's the rub - what happens when the sun sets or winds calm? Yerevan Jinyuan Energy ...

Solar energy is widely available in Armenia due to its geographical position and is considered a developing industry. In 2022 less than 2% of Armenia's electricity was generated by solar power.

The objective of the present report is to assess Armenia's legal and regulatory framework for energy storage and provide recommendations for reforms that would be needed to ...

Armenia's next steps, therefore, will be critical: further investment in grid modernization, expansion of export capabilities, and the rollout of advanced storage technologies all stand as ...
