Container Energy Storage System (CESS) is a modular and scalable energy storage solution that utilizes containerized lithium-ion batteries to store and supply electricity.

Last September's Hurricane Fiona exposed the vulnerability - Puerto Rico's grid collapsed while neighboring Santo Domingo kept lights on using temporary storage units.

The Santo Domingo energy storage project bidding represents a golden opportunity to showcase innovative solutions while addressing critical grid stability needs.

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play ...
