What is solid bifacial framed glass-glass solar module?

SOLID Bifacial Framed glass-glass solar module offers enhanced structural integrity, making it perfect for carports and other robust installations. This glass-glass, transparent module with a 3.2 mm glass and framed design ensures long-lasting performance. For a seamless look, a option is available.

What are glass-glass PV modules?

Glass-glass PV modules, also known as double glass solar panels, are photovoltaic modules encapsulated with tempered glass on both the front and back sides. Compared to traditional glass-backsheet modules, they offer greater durability and environmental resistance.

Which solar module is right for You?

For those who seek both high efficiency and a sleek appearance, the framed glass-glass solar module SOLID Blackstar is the ideal choice. This full-black module features 2 mm glass, a black aluminum frame, and a black covering, making it a perfect fit for traditional solar power plants.

What is a solid solar module?

Our SOLID series of frameless glass-glass solar modules combines high performance with modern design, offering versatile solutions for various applications. These modules are thoughtfully designed and Cradle to Cradle certified, ensuring they meet high environmental and sustainability standards.

Also known as solar windows, transparent solar panels, or photovoltaic windows, this glass integrates photovoltaic cells to convert solar energy into electricity, revolutionizing ...

2025 PV Module Reliability Scorecard () results showed: 20% of BOMs undergoing the PQP's Mechanical Stress Sequence (MSS) experience broken glass or frames ...

Our technology allows glass to change from transparent to opaque on demand, making it ideal for privacy, shading, and solar control. Sleek and ...

Our GLASS-GLASS series stands for the highest safety requirements and resilience thanks to the double glass structure with hardened anti-reflective glass. This significantly minimises the risk ...
