How much money will Buenos Aires invest in a new storage system?

"This initiative, unprecedented in the country but already applied worldwide, seeks to add 500 MW of storage capacity in critical nodes of the Metropolitan Area of Buenos Aires (AMBA), with an estimated investment of US\$500 million and an execution period of between 12 and 18 months.

Why is Argentina a good stance on energy storage?

In Argentina, the stance provides a good lesson to the European stakeholders, especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.

What is the Buenos Aires grid program?

Intended to strengthen the grid in the greater Buenos Aires region, the program has attracted a lot of attention; it has been subscribed to projects that are about twice the desired capacity.

Why is Argentina planning to expand its electricity transmission network?

Argentina is simultaneously planning over \$1 billion in investments to expand its electricity transmission network, a project vital for reinforcing supply and accommodating future growth. This dual approach - storage for immediate resilience and transmission upgrades for long-term capacity - is a smart strategy.

The \$540 million investment in energy storage isn't just about keeping the lights on in Buenos Aires. It's a strategic bet on a more ...

The international tender, first announced in February, aimed to secure 500 MW of energy storage capacity for critical points in the Buenos Aires Metropolitan Area (AMBA) grid.
