What is a solarcontainer?

The Solarcontainer is a photovoltaic power plantthat was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system,a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany,the solar container can supply approx. 32 householdswith climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations,power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean,renewable solar energy.

Why should you choose a modular energy storage container?

Advanced monitoring systems and IoT integration ensure optimal performance and remote management capabilities. The modular design allows for easy expansion,with the option to expand the battery storage system by 100 - 500kwh,making our energy storage container perfect for meeting growing energy demands.

Supplier highlights: This supplier is both a manufacturer and trader, cooperates with Fortune 500 companies, and provides OEM services for well-known brands. It mainly exports to Cambodia, ...

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.

We make mobile solar containers easy to transport, install and use. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ...

Enjoy Free Shipping Worldwide! Limited Time Sale Easy Return.
