Can Burkina Faso achieve 95% electricity access?

The country aims to reach 95% electricity access, with 50% in rural areas and universal access to clean cooking solutions in urban areas, with 65% in rural areas by 2030, up from 9% in 2020. The utilisation of Burkina Faso's renewable resource potential would enable the country to reduce its heavy reliance on thermal generation and energy imports.

Is Burkina Faso suitable for solar power projects?

This suitability assessment was carried out at the request of the Government of Burkina Faso to map potential areas for utility-scale solar photovoltaic (PV) and wind projects. Currently, less than 25% of the population has access to electricity and the majority of those with access live in urban areas.

How much solar energy does Burkina Faso have?

larly solar energy. Burkina Faso benefits from daily sunlight of 5.5 KWh/m<sup>2</sup> for 3000 to 3500 hours per year, with a uniformly distributed solar resource across the national territory, yielding an

What changes have been made in Burkina Faso since the last iteration?

UNCILMajor changesSince the last iteration, significant progress has been made with the successive commissioning of new solar power plants in Burkina Faso in 2024, and the continuation of electrification efforts despite the security crisis. The national coverage rate has increased to 50%, compared to a national electrification rate

More specifically, the project will result in the connection of 218,400 new households to the power grid using an innovative system that will defer payment of ...

New modular designs enable capacity expansion through simple system additions at just \$200/kWh for incremental capacity. These innovations have improved ROI significantly, with ...

In terms of wind energy, Burkina Faso is exploring its significant potential, estimated at about 1.96 GW. Studies have identified vast areas suitable for both solar PV and ...

Published January 2025, this map provides a detailed view of the power sector in Burkina Faso. The locations of power generation facilities that are operating, under ...
