Hey Steve, this is a great question but it's still recommended to have lithium batteries in a different compartment from inverters like the part # RED23RR because lithium ...

Connecting a lithium battery to an inverter is crucial for converting the stored DC (Direct Current) energy into usable AC ...

Connecting inverters to batteries is an important part of an off-grid power solution or backup power system, and the right connections ensure that the system runs efficiently.

Not all inverters are designed to work with lithium batteries, so it's essential to ensure that your chosen inverter can support this type of battery. The first thing you need to ...
