Why did Spain & Portugal have a solar power blackout?

PARIS -- Recent power outages in Spain and Portugal have focused attention on Europe's solar energy infrastructure, which sources its parts almost entirely from China. The cause of the widespread late-April blackout in the two countries is still under investigation.

Where does solar energy come from in Spain?

Many homes in Jaen in southern Spain depend on solar energy given as the region is sunny all year round. © Reuters PARIS -- Recent power outages in Spain and Portugal have focused attention on Europe's solar energy infrastructure, which sources its parts almost entirely from China.

Are Chinese solar panels a threat to Europe's power infrastructure?

Awash with Chinese solar panels and parts made by companies such as Huawei Technologies, Europe is increasingly concerned about the safety of its power infrastructure, especially as its energy transition has led to the digitalization of the sector, making it vulnerable to remote attacks.

Can Europe cut reliance on China in solar?

Beijing's heavy subsidies and investment in the industry drove down solar panel costs by 80% in a decade, which led to a boom in solar capacities worldwide. For Europe, cutting all reliance on China in the sector may be unrealistic though.

Galp has kicked off construction on five new battery energy storage system (BESS) projects in Spain and Portugal, marking a major step in its clean energy strategy. According to ...

On May 27, China's first fixed-pile offshore photovoltaic project, the 400 MW offshore photovoltaic project in Zhaoyuan by China General Nuclear Power Group, officially ...

Recent power outages in Spain and Portugal have prompted a scrutiny of China-made solar parts, particularly after the discovery of unauthorized communication devices ...

PARIS -- Recent power outages in Spain and Portugal have focused attention on Europe's solar energy infrastructure, which sources its parts almost entirely from China. The ...
