Strategically situated on a 32.29-hectare remediated landfill site near the capital, the solar plant transforms previously unused land into a productive clean energy asset.

The project will be implemented in three stages. The first stage involves installing solar PV panels on building rooftops, car sheds, and open areas at PMB. Upon the completion ...

Following the RFI, the project progressed to a Request for Proposal (RFP) stage in 2021 for the provision to invest, build, and operate the 30MW solar power plant.

Despite its compact land area, Brunei has a stable economy, strong infrastructure, and a growing focus on energy diversification, making it a strategic market for solar integration, especially in ...
