Summary Overview Operation Temporary sites Employment Spy agency setup Off-grid systems Camouflage A cellular network is a network of handheld mobile phones (cell phones) in which each phone communicates with the telephone network by radio waves through a local antenna at a cellular base station (cell site). The coverage area in which service is provided is divided into a mosaic of small geographical areas called "cells", each served by a separate low power multichannel transceiver and antenna at a base station. All the cell phones within a cell communicate with the system thr...

The present document describes the general aspects and principles relating to the Technical Specifications for the GSM MS-BSS interface. The following documents contain provisions ...

These criteria are specified by the mobile communication standardization body 3GPP. Based on the 3GPP base station conformance ...

Backhaul Connection: The backhaul connection links the base station to the core network in the mobile communication system. It ...
