How much does an off-grid solar system cost?

An off-grid system costs between \$45,000 and \$65,000, with an average price closer to \$55,000. Cost varies based on your system size, type, and energy needs, as well as the components you choose. How long do off-grid solar systems last? An off-grid system can last 25 years or more with proper maintenance.

How much does a solar energy system cost?

It's projected that labor expenditures for a solar energy system are around \$0.59 per watt, which comes to roughly 10% of the total system cost. As an example, you could expect to pay about \$3,000 in labor costs for a 5kW solar energy system, a common size for a residential system.

What is an off-grid solar power system?

An off-grid system is a solar power system that doesn't connect to a utility grid. Typically, these types of systems are used in locations that don't have access to power lines or where the cost of connecting to the grid is prohibitive. If you're considering installing an off-grid solar power system, you'll want to know its cost.

System Size

Does an off-grid solar system work with a large home?

Yes, off-grid systems work with any residential home, even larger ones. Off-grid systems work best for remote homes or those with limited access to utility power. Due to their size and power capacity, off-grid systems are more expensive than grid-tied solar systems.

NLR's PV cost benchmarking work uses a bottom-up approach. First, analysts create a set of steps required for system ...

Depending on the size, number, and quality of panels, your solar array will cost, on average, anywhere between \$5,000 and \$30,000. Numerous government programs and tax ...

Similar to a simple DC solar system, but with a battery backup to store electricity for cloudy days, a mixed DC and AC system costs between \$10,000 and \$50,000. The price depends on the ...

Using your daily energy usage and Peak Sun Hours, and assuming a system efficiency of 70%, the calculator estimates the Wattage required for your off-grid solar system's ...
