Why is Cuba importing portable generators?

A man starts up a gasoline-powered generator in the town of Bataban, Mayabeque province, Cuba. The country's energy problems have fuelled the importation of portable generators in the face of the frequent power cuts caused by the energy crisis in this Caribbean island nation. Is there a problem with solar power in Cuba?

Another hurdle for the expansion of solar power in the residential sector lies in the electricity tariff subsidy, which is charged in a devalued currency. According to official figures, around six percent of the more than four million households in Cuba consume more than 500 kilowatt hours (kWh) per month.

How much electricity does Cuba consume a month?

According to official figures, around six percent of the more than four million households in Cuba consume more than 500 kilowatt hours (kWh) per month. Above that threshold, the electricity tariff was increased by 25 percent since March to eliminate subsidies.

How does Cuba generate electricity?

About 95 percent of Cuba's electricity generation relies on fossil fuels, which include the natural gas produced with domestic oil, offshore oil rigs leased from Turkey, as well as diesel and fuel oil based generators and engines.

This article delves into the implications of this shortfall and explores broader issues within Cuba's energy landscape that continue to challenge its citizens.

You'd think an island blessed with year-round sunshine would've cracked the code on renewable energy storage. Yet Cuba's power outages increased by 23% in 2023 despite adding 450MW ...

How do Battery Energy Storage Systems (BESS) benefit Cuba's power grid? BESS units store excess energy generated from renewable sources during low-demand periods, ...

This mismatch has sparked a gold rush in photovoltaic (PV) systems, particularly focusing on energy storage inverters. If you're eyeing this market, understanding Cuba photovoltaic energy ...
