Learn about density as the relationship between mass and volume and how to calculate and compare the densities of different materials. Explore how density explains why some objects ...

Density, mass per unit volume of a substance. The formula for density is $d=M/V$, where d is density, M is mass, and V is volume. Density is commonly expressed in units of ...

Density is a characteristic property of a substance. The density of a substance is the relationship between the mass of the substance and how much space it takes up (volume). The mass of ...

Density (volumetric mass density or specific mass) is the ratio of a substance's mass to its volume. The symbol most often used for density is ρ (the lower case Greek letter rho), ...
