In this paper, several drying systems, especially cabinet types assisted with phase change material (PCM), were reviewed. Different technologies for thermal energy storage in ...

In this research domain, incorporating a solar dryer that comprises of two Double Pass Solar Air Heaters connected in series, a blower, a heat exchanger for energy storage ...

To address these challenges, the proposed SCD design incorporates carbon-fiber reinforced polymer (CFRP) panels for structural strength and durability, aerogel insulation for superior ...

Therefore, the main objective of the present study was to develop a novel solar dryer integrated with soapstone as a TES material and evaluate its performance. The ...
