---

The U.S. Department of Energy has released a "Distributed Energy Resource Interconnection Roadmap," developed through a stakeholder process, that presents 39 ...

Distributed energy resources (DERs) have become a major part of the power generation landscape, particularly in support of a more reliable and resilient grid. Generating ...

Aggregating distributed energy resources into virtual power plants will make the electric grid more resilient and efficient, lower energy burdens for customers, reduce reliance ...

In particular, higher levels of DERs provide an opportunity to leverage these resources to optimize grid investments and improve overall power system performance, economic efficiency, and ...
