Should lithium-ion batteries be used in air transport?

Currently, it is strongly recommended that when offered for air transport, equipment that is packed with, or contains, lithium-ion batteries, and vehicles powered by lithium-ion batteries have the batteries at a state of charge not exceeding 30% of their rated capacity.

How many lithium-ion batteries can be sent by air?

If not inside a device like a smartphone, the batteries must be in a hard cased container. There are restrictions as to how many lithium-ion batteries can be sent within separate containers by air. Only a maximum of four can be sent, with two per container, and each battery must have a rating of below 100 watts per hour.

What are the shipping requirements for lithium batteries?

Some general shipping requirements to transport lithium batteries internationally include: Lithium batteries weighing over 35kg must be approved by the national authority of the shipping and destination country before shipment. Defective or damaged lithium batteries must not be transported.

How many lithium batteries can be shipped?

Only a maximum of four can be sent, with two per container, and each battery must have a rating of below 100 watts per hour. It is essential to note that some countries have their own regulations and restrictions for shipping lithium batteries, so it is crucial to check with the destination country's customs authorities before shipping.

There are restrictions as to how many lithium-ion batteries can be sent within separate containers by air. Only a maximum of four can be sent, with two per container, and ...

If the Watt-hour rating isn't clearly marked on your battery case, and the information isn't included on a battery specification or Safety Data Sheet, you can simply determine the battery's Wh ...

Outcome 2: Solar equipment imported into Djibouti for individual energy self-sufficiency meets government standards and is sold and installed by certified retailers, ensuring consumer ...

This 2024 guide covers essential requirements for transporting both lithium-ion (UN3480) and lithium-metal (UN3090) batteries by air, sea, and ...
