In this post we will identify the critical challenges in macro base station synchronisation and what needs to be considered when selecting synchronisation solutions.

PDF | Mobile Base Station Architecture Evolution and Synchronization Challenges: Role of IEEE 1588 PTP in 5G Networks | Find, read and cite all the research you need on ...

As we mentioned earlier, 5G will require tighter synchronization in frequency and in phase to support stricter timing accuracy requirements and advanced technologies.

In this post we will identify the critical challenges in macro base station synchronisation and what needs to be considered when selecting ...
