Kabul's shared energy storage power station bidding represents a pivotal step toward stabilizing Afghanistan's energy grid and integrating renewable energy. This initiative targets investors, ...

One notable initiative is the development of solar power plants in Kabul, which utilize the city's abundant sunlight to generate electricity. These solar power plants not only reduce reliance on ...

But here's the twist: Afghanistan gets over 300 sunny days a year. If Afghanistan were a smartphone, sunlight would be its forever-full battery. The catch? Turning that solar ...

It is now fully operational. The project, with a generation capacity of 10 MW, aims to enhance domestic electricity production, leverage readily available resources for power ...
