Transparent bifacial glass-glass modules by ASWS with two panes and film, like laminated car glass. Ideal for efficient solar energy solutions.

The double-glass bifacial module with mainstream structure has the advantages of long life cycle, low attenuation rate, weather resistance, high fire rating, good heat dissipation, good ...

Solar photovoltaic glass is a kind of special glass that can use solar radiation to generate electricity by laminating into solar cells and has related current extraction devices and cables. ...

Glass-glass module structures (Glass Glass or Double Glass) is a technology that uses a glass layer on the back of the modules instead of the traditional polymer backsheets.
