How much does an inverter cost?

Medium Residential Systems (6-10 kW): You'll likely need an inverter between 6 and 10 kW, with costs between \$1,800 and \$3,500. Large Residential/Small Commercial Systems (10+kW): These require inverters 10 kW and above, with prices starting around \$3,000 and going up significantly depending on the specific application.

What type of Inverter should I buy?

This equipment is ideal for installation in residential areas, is highly efficient, reliable and durable. Inverters with single-phase and three-phase alternation current output of 220 and 380 V are readily available in our online store. Three-phase models can be used in homes or industrial sites.

How to choose a solar inverter?

When selecting an inverter, consider: 1. Power Output: Match your solar panel wattage. 2. Battery Compatibility: If planning for a hybrid solar power system. 3. Warranty & Reliability: Ensure at least 10-15 years of warranty. 4. Brand Reputation: Investing in a trusted brand can guarantee better performance and durability.

What is a string inverter?

String inverters are the first thing that comes to mind when we talk about solar inverters. String here stands for several panels connected together in series. It's reasonably cheap and highly efficient. Shading is what string inverters fear the most.

EK SOLAR ENERGY single-phase micro inverter is designed for distributed photovoltaic systems and is suitable for residential, commercial rooftops and small ground power stations.
