---

The fire codes require ESS to be listed to UL 9540. For existing ESS that were not listed to UL 9540, NFPA 855 provides a measure of retroactivity, requiring the operator to provide an HMA ...

\*\*Establishing stringent standards for energy storage cabinets is imperative for enhancing safety, reliability, and operational efficiency in energy management systems.

We facilitate the early adoption of energy storage technologies in support of the U.S. Department of Energy's (DOE) goals of an equitable, clean, resilient, and secure grid of the future.

When installing energy storage cabinets, local electrical and building safety regulations must be followed, which may include but are not limited to:
