Are energy storage systems fire-resistance rated?

1206.11.3 Fire-resistance rated construction. Rooms and other indoor areas containing energy storage systems shall be separated from other areas of the building in accordance with Section 1206.14.4 and Chapter 7 of this code. Energy storage systems shall be permitted to be in the same room as the equipment they support.

What is an energy storage cabinet?

ENERGY STORAGE SYSTEM CABINET. A cabinet containing components of the energy storage system that is included in the UL 9540 listing for the system. Personnel are not able to enter the enclosure, other than reaching in to access components for maintenance purposes.

Are energy storage systems safe?

In 2020, the Uniform Code was amended to include the latest safety considerations for energy storage systems. All energy storage systems must be designed and installed in accordance with all applicable provisions of the Uniform Code.

Which gypsum board should be used for energy storage?

R327.8 Fire-resistance rating. Rooms and areas containing energy storage systems shall be protected on the system side by no less than 5/8-inch Type X gypsum board or equivalent, installed on the walls and ceiling of the room or area.

The innovation in fire protection systems within outdoor energy storage cabinets demonstrates how the industry is evolving from focusing solely on capacity to prioritizing resilience and security.
