This white paper describes the advantages and disadvantages of EPO for protecting data centers and small IT equipment rooms containing uninterruptible power supply (UPS) systems.

EPO stands for Emergency Power Off. UPS that include part number 011 are called Type-C, and they have an EPO interface. You can utilize this interface to control (e.g., send a shutdown ...

Emergency Power Off (EPO) functionality enables an uninterruptible power supply and other related equipment such as generators to be remotely shut down in the event of a fire or ...

A simple Emergency Power Off (EPO) switch--often the "Big Red Button"--poses one of the largest risks to uptime in data centers. An accidental press or wiring fault can disconnect ...
