Why did Nokia launch a 5G network management system in Finland?

Conducted in Finland during March, it marks a significant advancement in 5G capabilities for critical communications, particularly within the defence sector. Additionally, Nokia's intelligent network management system, MantaRay NM, provided a consolidated network view, optimising monitoring and management.

How did the Telia 5G trial work?

The trial was achieved through Nokia's 5G Core Software-as-a-Service (SaaS) and AirScale 5G base stations powered by ReefShark System-on-Chip technology, connected to Telia's commercial network

What is 5G & network slicing?

Jari Collin, CTO at Telia Finland, commented: "5G and network slicing enable secure, mission-critical communications. In collaboration with the Finnish Defence Forces and Nokia, we are pioneering in using commercial technology for critical defence communications.

What is a 5G Brain Center?

Often referred to as the brain center, this includes: Baseband Unit (BBU): Handles baseband signal processing. Remote Radio Unit (RRU): Converts signals to radio frequencies for transmission. Active Antenna Unit (AAU): Integrates RRU and antenna for 5G-era efficiency. 2. Power Supply System

The Finnish use case focuses on developing a remote base station site in arctic weather conditions, featuring a remote radio head, RES (wind and photovoltaic with battery assembly ...

Explore how 5G base stations are built--from site planning and cabinet installation to power systems and cooling solutions. Learn the essential components, technologies, and ...

The demonstration involved maintaining a continuous and secure 5G data connection across three different national networks. This capability is vital for modern defence ...

While Finland has made significant strides in 5G, some challenges remain. Infrastructure Costs: Expanding 5G to remote areas requires high investment in base stations ...
