---

Emergency and standby power generators and uninterruptible power supply (UPS) systems provide backup power for hospitals, nursing homes, and 24-hour care facilities. A fire that ...

The key to understanding the requirements outlined in NFPA 110 lies in acquainting yourself with the way emergency power supply systems (EPSS) are classified: By Level, Class and Type.

A UPS differs from an emergency power system or backup generator in that the UPS provides near-instantaneous protection from unanticipated power interruptions from the main power ...

Per the NFPA 110, a emergency power system is required to power these devices within 10 seconds of an actual outage. It should be noted that all life safety systems, such as ...
