What is solar power generation in France?

This graph provides an annual and monthly overview of solar power generation in France. The evolution of solar photovoltaic generation is an important parameter in the energy transition, as it is a renewable and low-carbon energy. In 2022, solar power generation rose sharply on the back of expanded capacity and good sunlight.

How much solar power does France have in 2023?

In 2023, the PV energy capacity in France amounted to approximately 20.5 gigawatts, making France the fifth European country for cumulative PV capacity that year. Despite this high ranking, solar PV power generation was still behind hydropower and wind renewable energy production.

Does France have a solar energy sector?

The exponential growth of the solar photovoltaic energy sector in France has never stopped since its inception in the early 2000s. In 2023, the PV energy capacity in France amounted to approximately 20.5 gigawatts, making France the fifth European country for cumulative PV capacity that year.

Will France have a solar & ground-mounted PV tender?

Rooftop solar and ground-mounted PV tenders will be held annually to boost France's installations. Image: Axpo. France has revised down its solar PV target by 2035 from 100GW to 90GW in its latest Multiannual Energy Programme (PPE3).

France is among the top nations for significant growth in solar energy generation in recent years, and that continued in the third quarter.

Discover how EDF is boosting the expansion of solar energy in France and worldwide. A comprehensive view and major large-scale projects for tomorrow's photovoltaic energy.

In 2023, the PV energy capacity in France amounted to approximately 20.5 gigawatts, making France the fifth European country ...

France has revised down its solar PV target by 2035 from 100GW to 90GW in its latest Multiannual Energy Programme (PPE3).
