-----

The increasing demand for higher power, improved power density, reduced system costs, and faster charging capability of electric vehicles has triggered developments towards ...

Figure 1 illustrates the differences in the voltage waveforms produced by the conventional 2-level inverter vs 3-level and 5-level MLIs. It's difficult to see how the 2-level ...

With the ongoing trend toward higher DC-link voltage in electric vehicles, some multilevel structures have been investigated as a feasible and efficient option for replacing the two-level...

This paper discusses high DC link voltage benefits in light-duty passenger BEVs, presents the state-of-the-art of different conventional ...
