BESS projects support the overall reliability and resilience of the electric system, while also enhancing the value of intermittent renewable generation resources, such as solar.

Yes, Georgia has set specific targets for energy storage deployment through the Georgia Energy Storage Initiative (GESI). The state aims to deploy 1,200 megawatts (MW) of energy storage ...

The Georgia Public Service Commission (PSC) has signed off on Georgia Power's plans to build 500 megawatts (MW) of battery energy storage across four locations, voting ...

This profile is key for determining the proper size for the solar array and energy storage system, to provide sustained operation for the critical load, as well as charge the battery.
