What is the heat storage facility in Hamburg-Altenwerder?

The heat storage facility, which was ceremonially opened today in Hamburg-Altenwerder, contains around 1,000 tonnes of volcanic rock as an energy storage medium. It is fed with electrical energy converted into hot air by means of a resistance heater and a blower that heats the rock to 750°C.

What does Hamburg energy do?

Hamburg Energie is responsible for marketing the stored energy on the electricity market. The energy provider is developing highly flexible digital control system platforms for virtual power plants. Connected to such an IT platform, ETES can optimally store renewable energy at maximum yield.

Does gasnetz Hamburg have a gas transfer station?

Gasnetz is also building a gas transfer station on the site. This network connectivity not only creates a connection to Gasnetz Hamburg's HH-WIN distribution network project, but also a long-term connection to the European Hydrogen Backbone.

How does the port of Hamburg affect energy demand?

In addition, the strong deviations of the HafenCity's energy demand are dampened by the demand of the Port of Hamburg. Thus, connecting more districts of Hamburg or even other cities in Germany or the European Union can have similar effects.

Discover how Hamburg's cutting-edge energy storage solutions are reshaping renewable energy integration and grid stability. This article explores the technical innovations, environmental ...

Germany, in its transition to renewable energies, faces challenges in regulating its energy supply. This study investigates the impact of various technologies, including energy ...

As Europe pushes toward carbon neutrality, Hamburg emerges as a pioneer with its groundbreaking energy storage modernization plan. This article explores how Germany's ...

The heat storage facility, which was ceremonially opened today in Hamburg-Altenwerder, contains around 1,000 tonnes of volcanic rock as an energy storage medium.
