---

Our specialty graphites and graphite components enhance the performance of systems and processes in numerous applications - from the production of flawless glassware to thermal ...

In PV solar panel production, graphite products, particularly hot zone components like crucibles and heaters, are used in Czochralski (CZ) and directional solidification (DSS) furnaces to ...

Carbon graphite bearings can be utilized as the glass's raw material is fed into the furnace. Carbon graphite rollers can be used to transport semi-molten glass as it is quenched ...

We develop essential graphite components for the highly sensitive manufacturing process of solar cells for the photovoltaic industry.
