What is a firefighter storage container?

Portable storage containers are ideal structures for fire departments to conduct firefighter training. Shipping containers are highly versatile and customizable, allowing fire departments to stack storage units on top of one another to create any number of unique building designs.

Why did the fire department use a shipping container complex?

The fire department wanted to use a shipping container complex, as these facilities allow firefighters to better train in real-life scenarios with the necessary safety guards in place.

Can you use shipping containers to build custom firefighter training structures?

Here's a few benefits in using shipping containers to build custom firefighter training structures. Using shipping containers for firefighter training is probably the most cost-efficient option there is. Used shipping containers are low-cost to purchase and can be modified in any way the fire department sees fit.

How much does a shipping container cost for firefighter training?

Using shipping containers for firefighter training is probably the most cost-efficient option there is. Used shipping containers are low-cost to purchase and can be modified in any way the fire department sees fit. A single shipping container can cost as low as \$1,000.

Repurposed shipping containers are becoming a powerful tool for building realistic, cost-effective fire training structures--and we're here to make that process easy and ...

By using durable, weather-resistant containers for live-fire training scenarios, Angola FD can create controlled environments that mirror challenging conditions firefighters face on the job.

At Fire Training Structures, we modify and customize shipping containers for firefighter training. Containers are affordable, adaptable and durable.

One such innovation is the container fire station, a transformation that combines utility with sustainability in emergency services. Imagine a fully equipped fire station, housed ...
