-----

An experimental setup using four Li-ion cells is also executed to explore the stability, robustness, and precision of the proposed cell balancing algorithm.

To improve the balancing time of battery energy storage systems with "cells decoupled and converters serial-connected," a new cell voltage adaptive balancing control ...

It balances charge flow to the different cells in a battery pack to prevent overcharge or deep discharge to avoid deterioration or failure. Efficient cell balancing improves the energy ...

Considering the significant contribution of cell balancing in battery management system (BMS), this study provides a detailed overview of cell balancing methods and ...
