Series 2290 High Voltage Power Supplies are ideal for high voltage device and material testing, as well as high energy physics experiments. Choose the Model 2290-5 Power Supply for ...

There is option for negative output from -10kV to -50kV. The PCH series is high power switching programmable DC power supply with rated output power of 500W to 8KW.

The MX10 is rated at 10kV @ 100uA and is packaged in a shielded metal enclosure. This unit features a logic signal input to control output polarity reversal. A HV inhibit feature, along with ...

With unity power factor (1.0), it allows more connected loads saving space and costs. This 230V in/ 230 out single phase UPS has scalable runtime options with matching external battery ...
