Is battery storage a key technology for Mozambique's future?

Globeleq sees battery storage as a key technology for Mozambique's future. Storage costs are expected to continue decreasing, so those systems will become more competitive and will be able to contribute more.

When did Globeleq & Mozambique launch a solar power plant?

Our solar power plant in Cuamba was inaugurated in September of 2023. It marked another milestone for Globeleq and Mozambique, as it was the first IPP to integrate a utility-scale energy storage system.

Should Mozambique export electricity?

One of the big challenges of Mozambique is its size and shape, which make the transportation of electrons across the country quite expensive. Exporting electricity would bring foreign currency that can support investments in domestic transmission and distribution infrastructure.

Why should Mozambique be a regional power supplier?

First, to ensure that Mozambique has reliable and cost-effective power generation capable of meeting its 2030 electrification goals. Second, to establish Mozambique as a regional power supplier of choice. South Africa has a critical shortage of electricity, and Zambia and Zimbabwe also require power.

Well, you see, the country's current 83 MW/166 MWh battery storage capacity barely scratches the surface of what's needed to stabilize its grid and unlock solar/wind investments.

Do you expect energy storage systems will become more prevalent in years to come? Globeleq sees battery storage as a key ...

Cost Projections for Utility-Scale Battery Storage: 2021 Update. In order to differentiate the cost reduction of the energy and power components, we relied on BNEF battery pack projections ...

The first large scale of pv storage system in Mozambique, 19kw with 7kwh battery, the plant, which is the first utility-scale solar and energy storage plant in the country, is the ...
