Should you upgrade to 5G in Latin America?

According to a GSMA Intelligence survey, nearly two thirds of consumers in Latin America intend to upgrade to 5G. Around 30% of those surveyed in the region are unsure about whether to upgrade, while only 7% of people claim they do not intend to upgrade to 5G (the lowest of any region worldwide).

How many 5G base stations are there in the United States?

While China leads in sheer numbers, the U.S. is making steady progress. By late 2023, the country had between 150,000 and 200,000 active 5G base stations. The deployment strategy in the U.S. is different from China's, as it relies on private investment rather than government-led initiatives. Is this article too long?

What is 5G Americas?
