How big is the 5G base station market?

Macro cells represented USD 22.9 billion and 61.3% of the 2024 5G base station market share, providing umbrella coverage and mobility anchor services. Yet small cells are forecast to expand at a 29.4% CAGR, pushing their slice of the 5G base station market size toward USD 50 billion by 2030.

Why do we need a 5G base station?

As the number of IoT devices continues to grow, particularly in sectors such as healthcare, agriculture, transportation, and manufacturing, there is an increasing need for a robust and expansive 5G network. This demand is driving the installation of more 5G base stations to ensure that IoT systems can operate efficiently and reliably.

Why are telecom companies installing indoor 5G base stations?

To solve this, telecom companies are installing indoor 5G base stations, which are growing at a compound annual growth rate (CAGR) of over 30%. For businesses operating in offices, malls, or large commercial spaces, installing indoor 5G solutions can greatly enhance connectivity.

Which 5G base station market dominated the global market in 2023?

The Asia Pacific 5G base station market dominated the global market in 2023 and accounted for 32.67% of the revenue share.

The expenses for setting up the necessary 5G infrastructure and upgrading software are significantly high due to the large number of BTS units needed for continuous 5G service ...

The 5G base station is a fixed communication equipment that connects using a single or several antennas. It includes a wireless ...

The expenses for setting up the necessary 5G infrastructure and upgrading software are significantly high due to the large number of ...

A total of 5,275 standalone 5G base stations have been activated in Brazil - double the minimum commitment. This represents 6% of the overall 93,159 base stations in ...
