How many 5G base stations will India have by 2025?

The country has set an ambitious goal of deploying over 500,000 5G base stations by 2025, a target driven by telecom giants like Reliance Jio and Bharti Airtel. The Indian government has actively supported 5G expansion, conducting large-scale spectrum auctions and offering incentives for infrastructure development.

Why are telecom companies installing indoor 5G base stations?

To solve this, telecom companies are installing indoor 5G base stations, which are growing at a compound annual growth rate (CAGR) of over 30%. For businesses operating in offices, malls, or large commercial spaces, installing indoor 5G solutions can greatly enhance connectivity.

How many 5G base stations are there in Japan?

Japan had over 100,000 active 5G base stations by 2023. Japan's 5G network is expanding rapidly, with over 100,000 active base stations by 2023. The country has taken a strategic approach, focusing on major urban centers first and gradually expanding to rural areas.

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.
