After the studies are complete, an interconnection customer will determine whether the upgrade costs mean the project can economically interconnect to the grid.

The cost of grid connection is shaping up to be a major bottleneck for the continued acceleration of new energies. A good baseline is to expect \$100-300/kW of grid inter-connection costs, or ...

The assessment adds zinc batteries, thermal energy storage, and gravitational energy storage. The 2020 Cost and Performance Assessment provided the levelized cost of energy.

The goal of the database is to provide a useful, curated, and transparent source of information for assessing distribution grid integration costs associated with PV.
