What is a small cell in 5G?

Small cells are a new part of the 5G platform that increase network capacity and speed, while also having a lower deployment cost than macrocells. The compact size of a small cell requires that all components - especially power converters - provide high efficiency, better thermals and eventually the best power density possible.

How do small cells fit into the 5G ecosystem?

A cell tower (also called a macrocell) is a huge umbrella used to provide radio signals to thousands of users in large areas with minimal obstructions. To extend the coverage of a macrocell, distributive antenna systems (DASs) are used in conjunction with the cell tower.

How does a small cell base station affect a smartphone's battery life?

When a mobile device is close to a small-cell base station, the power needed to transmit the signal is much lower compared to the power needed to transmit a signal from a cell tower far away, thus extending smartphone battery life.

Why do small cells need a 5G antenna?

Increasing the frequency increases the speed of sending/receiving signals and helps shrink the size of the antenna, which in turn shrinks the size of the cell. Shorter wavelengths result in a decrease in signal penetration and radius, reinforcing the need for small cells. How do small cells fit into the 5G ecosystem?

Explore how 5G base stations are built--from site planning and cabinet installation to power systems and cooling solutions. Learn the essential components, technologies, and ...

This 5G Micro Base Station Power Supply offers dependable lithium battery backup in a compact, high-efficiency format. Built with LiFePO4 chemistry, it delivers long-lasting power for critical ...

In the 5G era, how to reduce power consumption is a question that the entire industry chain needs to think about. High efficiency, high power density, and high frequency ...

Building better power supplies for 5G base stations Authored by: Alessandro Peveri, and Francesco Di Domenico, both at Infineon Technologies Infineon Technologies - Technical ...
