The Red Sea Project, touted as the world's largest solar-energy storage microgrid project, utilises Huawei FusionSolar Smart String ESS solution, the company announced in a ...

One of Huawei's most prominent successes in this space is its grid-forming ESS deployment in the Middle East, specifically at the ambitious Red Sea development site. The ...

Covering 100 km of grid infrastructure, it is the world's first independent microgrid project to be fully powered by solar and energy storage without connection to any power network.

With a 400MW solar PV system and 1.3GWh of storage, this game-changing initiative, led by Red Sea Global, is set to power a premier hospitality destination along the ...
