The full weight of a 50 percent tariff on Indian goods took effect this week, undercutting one of the country's most promising markets for solar exports.

India's solar exports in Q1 2025 are just the beginning. With the right investments and policy support, India can double or even triple its export share in the coming years. ...

The sharp rise underscores India's growing footprint in the global clean energy supply chain, with Gujarat emerging as the clear hub of solar manufacturing and exports. Gujarat alone accounts ...

India's solar modules captured 97% of its exports to US (2023-25), up 9x in '23 & 2x in '24, as 19-21% cheaper alternative to US-made amid China curbs. Share rose to 11% vs ...
